

South Wingfield Primary and AVSSP

South Wingfield Primary School is affiliated to Amber Valley School Sport Partnership who provide a range of services and opportunities to support the school's delivery of PE, School Sport and Physical Activity.

Through our affiliation we are able to access PE planning resources for each year group themed around 6 different sports. The plans are high quality and easy to follow allowing for staff to plan lessons to best suit our children's needs and work within the facilities that we have. Each lesson includes fun, progressive activities from an effective warm-up to a competitive activity with the chance to differentiate learning to support students who are high/low achievers.

Lessons also include technical and tactical teaching points allowing staff to challenge our pupils in a variety of ways. The PE lesson planning we use also includes a PE assessment tracker giving staff the chance to efficiently assess pupils as Emerging, Expected or Exceeding from a physical, analytical and emotional aspect.

Our affiliation package also includes a large number of Inter-school events & competitions in a wide variety of sports. These events are categorised to encourage as many children as possible to represent their school throughout a given year and to help our staff select appropriate children to take part. Our children love taking part in these events and are always really excited to represent their school!

Through our affiliation we are also able to access Bikeability training which gives many of our children a chance to learn a vital life skill and increase their confidence on their bike as well as work towards earning their certificate!

South Wingfield Primary School also accesses various activity resources to implement in school, the most useful of which is the Mini Leaders resource. This, along with CPD training and the annual student conference, helps to put in place a culture of Year 5/6 leadership during lunchtime and throughout the school day. This allows our children to lead their peers and provide further opportunities for pupils to be active.
